USB Switch Adapter

KeySWITCH # 20124
Keyboard Keys
Space and Enter

MouseSWITCH # 20127
Mouse click
left and right

Multi2SWITCH # 20126
10 combinations
adjustable

The switch boxes are used to connect one or two switches or sensors to computers, tablets, etc.. They simulate keys or mouse functions. This allows to control many learning and communication software.

The functions can either be triggered via two individual buttons with a 1/8"/3.5mm mono jack plug or a sensor with two functions (e.g. Hy-Pneumax sipp and puff switch) with a 1/8"/3.5mm stereo jack plug.
